Compliance Software to be Featured in Case Study at the IT Compliance Institute Conference

April 23, 2007 -- Compliance Software, provider of next generation solutions for automating business processes for risk management and compliance regulations will be featured in a case study at the IT Compliance Institute Conference on May 4, 2007 in Washington, DC. The conference is at the Hyatt Regency Crystal City at the Reagan National Airport and the session is 7B from 1:40-2:55 PM.

Scott Rogers, Associate Director of Internal Audit at PPD, will be presenting a case study on how they solved the challenges of managing compliance complexity and control alignment utilizing the Compliance Software solution.

PPD is a leading global contract research organization for pharmaceutical, biotechnology, medical device, academic and government organizations. PPD had selected the Compliance Software solution because they wanted a single solution that was easier, more cost effective, and with the flexibility to start with their SOX processes and then extend to general business processes and future compliance and risk management requirements.

Compliance Software provides an integrated BPM-based solution for automating any risk, compliance or general business process via a single platform. Compliance Software is unique having built a template and forms driven application for easier implementation, customization and expansion that provides for a future-proof investment for risk management and compliance requirements.

In addition, Compliance's solution significantly improves management effectiveness with advance capabilities such as continuous control monitoring and its unique Individualized Task Routing™ (ITR) capabilities so that task owners only deal with their specific tasks thus eliminating access to complex systems and significantly reducing training and support costs.

About Compliance Software

Compliance Software offers a next generation, BPM-based solution for automating and managing business processes for COSO based Enterprise Risk Management (ERM) and compliance requirements such as Sarbanes-Oxley. Compliance solutions enable a future-proof investment that more effectively reduces costs with its unique Individualized Task Routing (ITR), optimized automation, and integrated roles driven interfaces for greater ease of use and lower training and support costs.
