Botswana's Ministry of Local Government Selects Compliancy Software to Automate and Manage Their Internal Controls Across Their Local Governments

January 20, 2009 -- Compliancy Software, provider of next generation GRC Plus™ solutions for automating business processes for Governance, Risk management, and Compliance regulation PLUS any general business operations was selected by the Republic of Botswana's Ministry of Local Government to automate and manage their internal controls across the local governments in the country.

The Republic of Botswana in Southern Africa boasts a growing economy and is the largest exporter of gemstone diamonds in the world as well as a large beef exporter to the European Union. The Ministry of Local Government is the lead organization in providing basic physical and social infrastructure to the local communities, ensuring local governance and operations through policy direction, capacity building and supervision, and coordination of activities of the central government at district levels.

The Ministry of Local Government in Botswana selected Compliancy to automate and manage their processes and internal controls across the many local governments in the country to consolidate, centrally monitor and provide consistency. The automation, documentation and management of these processes and controls ensure the local governments are getting the support they need, there is consistency in how programs are administered, and there is more effective accountability.

"Botswana's adoption of the Compliancy solution illustrates the global capabilities provided by Compliancy and the unique flexibility to easily and quickly automate custom processes with internal controls and regulatory level tracking and accountability," said Mark Shaw, President and co-founder of Compliancy Software.

Compliancy's application is an integrated BPM-based automation solution that is easier to use with integrated roles driven interfaces and its unique Individualized Task Routing™ (ITR) so that task owners only deal with their specific tasks thus eliminating access to complex systems and significantly reducing training and support costs. It offers advanced capabilities such as continuous control monitoring, rules driven escalations, customizable alerts and reporting, and web services driven application integration.

About Compliancy Software

Compliancy Software provides a single application that is BPM-based for automating any business processes with built-in compliance level controls to ensure results. Companies have the flexibility to start anywhere and grow to address all their Governance, Risk Management, and Compliance (GRC) requirements PLUS automate manual and custom controls for their general business operations such as financial processes. Compliancy Software is experienced in a broad range of process automation implementations across multiple regulatory compliance and business operations such Sarbanes-Oxley, FCPA, Month End Close and General Ledger reconciliation, Budget processes, Security processes and more. Compliancy Software can provide solutions ranging from on premise enterprise solutions to Software-as-a-Service to best fit a company's budget and requirements.
