Compliancy Delivers Mobile Solutions for GRC and FCPA/Anti-corruption Compliance

Research Triangle Park, NC - December 11, 2011. Compliancy, a leader in tailored FCPA/Anti-corruption and GRC (Governance, Risk, Compliance) automation solutions, announced today the availability of Compliancy mobile applications that extend access to the Compliancy GRC platform from smart phones and tablet devices.

Compliancy's mobile applications enables users to rapidly access and respond to compliance controls and procedures from any location in a secure manner to reduce delay, improve accuracy and act on business intelligence to ensure enforcement and tracking of compliance requirements.

What is unique to Compliancy's mobile solution is that a user can move seamlessly between mobile and non-mobile devices with no additional training. Forms are optimized for each device, the system automatically detects the device and users can switch between mobile and desktop/laptops on the same form. Every process, action and compliance related data is captured as part of the Compliancy platform to ensure enforcement, accountability and audit-ability.

In addition, managers can be informed immediately of a violation or pending violation of policies and procedures thus enabling faster reaction and mitigation to avoid costly issues.

Supported mobile devices include the iPhone, iPad, Android devices, and Blackberry. Check with Compliancy for support of other mobile devices.

"With the expanding mobility of employees and devices, it is critical that companies be able to effectively manage their GRC programs from anywhere at anytime," said Mark Shaw, CEO, President and co-founder of Compliancy. "Compliancy provides the most cost effective and secure method for integrating compliance program requirements with mobile applications and communications."

Compliancy enables any GRC and regulatory compliance program including world-wide FCPA/Anti-corruption programs to be more proactive and more effective by enforcing policies, ensuring accountability, providing real-time business intelligence, and providing auditable proof of compliance whether operating from the desktop, laptop, tablet or phone while on the go.

About Compliancy Software
Compliancy specializes in custom tailored risk and compliance automation solutions such as FCPA/Anti-corruption and other GRC applications by leveraging a company's investment in existing controls, processes and compliance programs. Processes and controls unique to the company and industry can be easily automated and standardized to accelerate process completion, more effectively manage risk and lower the cost of management.

Large multi-national, mid-size companies and government agencies choose Compliancy because of its greater flexibility and cost effectiveness. Compliancy makes it simpler to automate and integrate both a broad range of GRC requirements such as FCPA, Sarbanes-Oxley, and OMB A-123 and internal processes such as Financial Close Management. Compliancy can custom tailor the right program to best fit a company's needs and budget whether on-premise or Software-as-a-Service.
