Compliancy Celebrates its 13 Years of Multi-Compliance Leadership
Compliancy celebrates its 13th Anniversary with its newest multi-compliance cloud solution release

Research Triangle Park, NC – April 28, 2015. Compliancy celebrates its 13th anniversary by releasing the latest version of its cloud-based compliance management solution. It has been continually developing its core platform over this period as well as retaining and building its experience level with key employees. This has allowed Compliancy to continue to be an innovator and leader in the multi-compliance market.

Compliancy's solutions have evolved over the years, most recently making the transition to cloud based solutions, and continue to leverage the technology that has supported over one hundred customers including small, mid-sized, fortune 500 and US and foreign governments.   Recent investments have vaulted it to a leadership position in the information security, privacy and confidentiality for multi-compliance standards and regulations such as SOC, PCI, HIPAA HITECH and ISO 27001.

Compliancy will continue to not only invest in its technology but is focused on total compliance solutions by offering services to assist organizations in attaining and maintaining compliance with multiple information and business standards and regulations. Contact Compliancy at www.compliancy.com to learn more about how our experience is assisting organizations today.

About Compliancy

Compliancy specializes in multi-compliance automation solutions for enterprise or service bureau such as SOC, ISO, PCI, HIPAA, FCPA and other GRC applications by leveraging a company's investment in existing controls, processes and compliance programs. Processes and controls unique to the company and industry can be easily automated and standardized to accelerate process completion, more effectively manage risk and lower the cost of management. Large multi-national, mid-size companies and government agencies choose Compliancy because of its greater flexibility and cost effectiveness. Compliancy makes it simpler to automate and integrate both a broad range of GRC requirements.
